Claim Objections

Claims 1-9,13-18 are objected to because of the following informalities: In claim 1 line 6, "the blade portion" lacks proper antecedent basis. In claim 7 line 1, it appears that "the" should be inserted before "aeration tube". In claim 13 line 2, "the tip portion" lacks proper antecedent basis. In claim 15 line 8, it appears that "that" should be changed to "than". Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10,12,13,14 are rejected under 35 U.S.C. 102(b) as being anticipated by Knight et al. (6,003,612).

Knight et al. discloses a soil aeration tine comprising a means for fracturing soil including a curved (fig 1e) elongate member 3 (fig 1d), and a means for removing a soil plug 22 (see figs 1a, 1c, 2a-2e). It is noted that the inner surface of cutting edge 6 is considered to be concave, while the outer surface is considered to be convex (see fig 3c).

Allowable Subject Matter

Claims 1-9,15-18 are allowed.

Art Unit: 3671

Claim 11 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
